

The **Smarter Choice**

## **Environmental Policy – January 2010**

David Luke has been accredited with ISO14001 for implementing our Environmental Management System. Through this accreditation, we seek to continually improve our environmental performance and we are committed to monitoring and reviewing our progress in this area.

### **Environmental Impact reduction**

Through risk assessments of our activities, we aim to assess the environmental impact of our operations and reduce any negative consequences where possible. We have identified key areas where David Luke can reduce pollution, emissions and waste, such as recycling packaging materials; re-using and recycling office paper; efficient use of water and energy in our offices and monitoring and reducing our transport use through the supply chain. Our progress in these and other areas is monitored through internal review and external audits.

### **Global participation**

To succeed in improving our environmental credentials, we also aim to raise awareness, encourage participation and train employees in environmental matters. The section 'Ethical and Fair Trading' sets out our expectations of standards from our suppliers in relation to the environment and all aspects of trading fairly. It is also our aim to assist our Customers to use our products and services in an environmentally-sensitive way and the section 'Environmental Impact' outlines ways we can achieve this together.

### **Looking ahead...**

At David Luke, we have always had an unstated policy to act responsibly and ensure that our business activities have a positive impact for our suppliers, staff and customers. Through stating this policy, we aim to establish ourselves as ...

**.....*the environmentally aware supplier in the Schoolwear Industry.***
