

## **Polyester Cotton – Shirts & blouses (DL50,51,60,61,62,63)**

Fabric Construction: 65% Polyester, 35% Cotton woven shirting

Easy wear, easy care! David Luke shirts & blouses are made to ensure the wearer feels comfortable and looks good but also that caring for the garment is easy. It's a heavier fabric than most on the market, with twin needled seams for added strength.

### WASHING

- **Always wash at 40°C**, avoid strong fabric conditioners.

### IRONING

- With the easycare finish on these garments ironing is not always necessary if hung up after washing, however if you want a smart finish on the garment use the synthetic setting and iron directly on to the shirt/blouse (ironing is easier if the garment is slightly damp).

### DRYING

The Shirts and Blouses can be tumble dried on a cool setting, if exposed to too high a temperature the fibres can be damaged and shrinkage may occur.
