

THERE IS A DIFFERENCE

Swimming Costumes/ Trunks & Shorts

(DL 26 / DL 27 / DL 28 DL 33)

Fabric Construction : 80% Nylon / 20% Elastane

WEARING

- Avoid contact with rough surfaces such as concrete, swimming pool edges etc as this can wear down the fabric and cause holes in the garment. It can cause pilling; this is not a common problem for this fabric but please be warned.
- Rinse thoroughly in cold water as soon after use as possible. The chlorine in the pool water can breakdown the fabric. DL 27 & DL 28 now have a chlorine resistant finish, which will help prevent this, but it is always better to be safe than sorry.
- Do not pack or store when wet for any length of time. Do not leave in a wet towel as it can also cause damage to the fabric.

WASHING

- Always hand wash at 40°C.
- Never use strong washing powder containing bleaching agents.
- Never use fabric conditioner.

DRYING

- Never tumble dry, it can cause damage to the elastane and can melt the ties in the swimming trunks, making them stiff and almost solid.
- Always dry flat and out of direct sunlight.

IRONING

- Never iron any swimming costumes, there is absolutely no need and it will damage the garment.

STORAGE

- Never store in direct sunlight.
